Why CSM + GP-HRIS can replace GREENHRISMAIN employee management

Nabati Batangas · 2026-08-16 to 2026-08-31

GREENHRISMAIN is the old 201 / payroll file. It no longer stays current: wrong plant, stale daily rate, resigned people still Active, and a second Employee_id after resign instead of rehire. CSM Verified is the source of who is actually deployed — present, site, Casual vs Resigned. Directory keeps the person, employee code, and rates. GP did not log into office SQL Server. GREENHRISMAIN Employee_id below is Directory legacy_id.

What to say in the room

CSM is the source of who is actually deployed. The 201 should follow that person, not invent a new ID. Seven people on this DTR could not enter payroll until we used the CSM Directory id. Four were still sitting on Taytay, Laguna, or Baesa. Two have two live employee numbers for one person. Rates live on the Directory person and the position card — CSM has no daily_rate column.

How to walk GREENHRISMAIN

1. Open CSM · Nabati Batangas · Verified. That list is who is actually deployed this cycle (27 Casual on the DTR, plus 3 Resigned). GREENHRISMAIN is not that list.
2. Open GREENHRISMAIN Employee_id 27143 (Babadilla). That 201 was still on Taytay. Same person, wrong plant. Dayto is Laguna; Mazo and Umali are Baesa.
3. Open Employee_id 16797 and 25682 (Anonuevo). Two 201s. CSM points at 16797. Ops created 25682 after resign instead of rehire. Rubi is 20586 vs 24741.
4. Show GP cutoff ingest: 20 hours rows, then 27 after we applied CSM's tag. We did not insert anyone. Going forward, CSM Approve / Transfer / Resign writes the same Directory person.
5. Rate lag: the original 201 still carried the old daily rate (540 / 546 / Dayto 677.25). GP lifted from the later 201 or the Batangas position card. Billing daily rate is still 0 — not copied from payroll. Register is posted 5 Sep 2026. July office PDF is a different cutoff — names match; pesos will not.
